CAREER OBJECTIVE

Aspiring Web Developer with a strong foundation in HTML, CSS, JavaScript, and responsive design. Eager to contribute technical skills, solve real-world problems, and gain hands-on industry experience.

INTERNSHIPS

May 2024 – July 2024

- Developed an object detection system using YOLOv8 for real-time image analysis and object identification.
- Designed a Telegram bot for automated responses and performed data visualization to analyze and monitor AI model performance.

PROJECTS

Payment Fraud Detection System | MySQL, SQL

- Designed a normalized relational database for customers, accounts, devices, transactions, and fraud alerts using primary/foreign keys and SQL joins.
- Developed rule-based fraud detection and risk scoring queries to identify high-value transactions, unusual locations, failed payments, transaction velocity, and suspicious activity.

Pollution Level Classifier Using Gas Sensors

- Developed an IoT-based air quality monitoring system using gas sensors and a NodeMCU microcontroller to detect and classify pollution levels in real time.
- Processed sensor data and integrated hardware-software components to enable accurate monitoring, analysis, and display of environmental conditions.

EDUCATION

PottiSriramuluChalavadi Mallikarjuna Rao College of Engineering and Technology

B.Tech – Computer Science and Engineering (AI & ML)
CGPA: 8.19

Aug 2022 - May 2026

SR Gayatri College

Board of Intermediate Education, Andhra Pradesh
CGPA: 78.5

Aug 2020 - Apr 2022

TECHNICAL SKILLS

Languages: Python, Java,

Web Development: HTML, CSS, JavaScript, React Js, SQL

Machine Learning: YOLOv8, Data Visualization, Model Development

Soft Skills: Problem Solving, Communication, Teamwork, Time Management, Adaptability

CERTIFICATES

- Introduction to Machine Learning - NPTEL
- Short-Term Internship in AI - AIMERs Society
- Certification of participation in 24 hours National Level Hackathon 1.0 - in PSCMR CET
